

Public Transportation Division

Transit Advisory Grantee Groups

The Public Transportation Division is excited to announce and launch two Transportation Advisory Grantee Groups – urban and rural. The objective of establishing a Transit Advisory Grantee Groups (TAGG) is to provide the Director and the staff of the Public Transportation Division of NCDOT with timely and personal feedback regarding programs, funding, applications and relationships with PTD.

PTD works with a large, diverse group of public transportation systems across the state. In order to achieve an ideal swinging door of two way feedback between the grantees and the leadership of PTD the Transit Advisory Grantee Groups (TAGG) have representation from the primary grantee groups.

Thank you to the members of our first groups!

Natural Disaster Training

One of the many lessons learned from Hurricane Matthew is to train, train and train so we are ready to provide transportation and evacuation services when an event occurs. During the week of July 10, PTD hosted 3 webinars on natural disaster preparedness. The presentation is posted on PTD's website.

Pictures like this remind us of the need to PETE – Plan, Equip, Train and Exercise. Thank you Gwen Hinson for help us with this training.

PTD Activities Underway

July 2017 Activities
