DESIGN DATA
Functional Class. = Rural Principal Arterial
Design Speed = 55 mph
Max. Superelev. = 0.08
Partial Control of Access is defined as controlling to a
certain degree the right of owners or occupants of
abutting land or other persons to access, light, air or view
in connection with the highway. Partial control of access
shall be considered to prevail over the entire
project unless otherwise noted. Partial control of access
for this facility will be established on the Y-line.
Limited Control of Access is defined as controlling to a
greater degree than partial control of access the right of
owners or occupants of abutting land or other persons to
access, light, air or view in connection with the highway.
Limited control of access shall be considered to prevail
over the entire project unless otherwise noted. Limited
control of access for this facility will be established on the
Y-line. The Y-location may be preliminary.
