### Seat Belt Use Trends in North Carolina Compared to United States Overall

#### Study Details

24,065 observations were collected across 120 observation sites which includes driver and front right seat passenger seat belt use. Please note that historic NC rates are based on data collected in the month of June. Data for 2020 were collected in the month of September due to the COVID-19 pandemic. Data for 2021 and 2022 were collected in the month of June.
