<tr>
<td>Grade Level</td>
<td>Grades K-3</td>
</tr>
<tr>
<td>Approximate Time</td>
<td>30 minutes</td>
</tr>
<tr>
<td>Materials</td>
<td>Varied colors of construction paper, Markers, Tape, Flower cut outs, Scissors</td>
</tr>
</tbody>
</table>

## Lesson Foundation

### Vocabulary Associated with Lesson

Pollution, Grease, Runoff, Stormwater, Rain, River, Waste, Water

### Activating Strategy

Students will complete a KWL chart (what you **know**, what you **want** to know, and what you **learned**), leaving the L portion blank for the end of the lesson.

## Teaching Strategy

**Introducing the lesson:** Let's talk about stormwater pollution. By a show of hands, how many of you know what stormwater pollution is? If not, what do you think it is? Have you ever thrown something out of the window, or down a drain? Have you ever thought about what happens to those items and where it goes?

*(Gather the students’ responses and begin to explain what stormwater is. You can utilize the “Top 10 Myths” document as a guide.)*

*(Show the students the completed Stormwater Sentence Flower and how you used the identified vocabulary words. Provide instructions to the students on their assignment and have them begin the lesson.)*

## Guided Practice

As students complete the activity, ask them how they plan to use their vocabulary words in a sentence. Make sure the students use the vocabulary words in a way that relates to stormwater pollution and its prevention.

## Independent Practice

**Sample homework assignment:** Complete the Stormwater Activities for kids Booklet (see handout).

## Summarizing Strategy

Students should be able to answer the essential questions presented at the beginning of the lesson and complete the L portion of the KWL chart.
