

**E**

Detour E will be used when southbound Capital Boulevard between Wade Avenue and Peace Street is closed. Traffic will be detoured around the closure using the existing southbound Wade Avenue off-ramp. Drivers will cross Wade Avenue near the railroad and then follow West Street for 0.5 miles to Peace Street, where they can get back onto Capital Boulevard at the interchange or continue into downtown via other roads. During construction, Wade Avenue will be modified to allow this southbound movement across the median. More information on this closure is in box 1 to the right.

The southbound Fairview Road flyover ramp will be closed during the entire construction duration. The northbound Fairview Road flyover ramp and the slip ramp from the business access road to southbound Capital Boulevard will remain open.

**F**

Detour F will be used when either the Wade Avenue flyover ramp (from northbound Capital Boulevard to Wade Avenue) or the loop (from Wade Avenue to northbound Capital Boulevard) is closed. Traffic will be detoured around the closure using Glenwood Avenue and Peace Street. More information on these closures is in boxes 2 and 3 to the right.

### 1 Southbound Capital Boulevard

Use Detour **E**

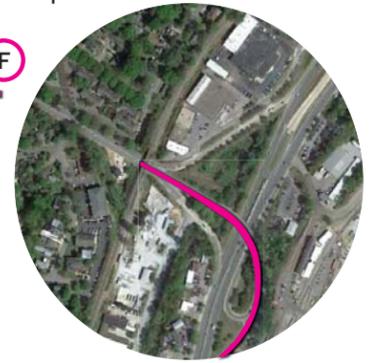

- Remove and replace pavement in area 1
- Southbound lanes will be closed from 9:00 pm Friday until 6:00 am Monday during this phase of construction
