

NCDOT to Update Traffic Forecast for Improvements to NC 109

To ensure project engineers have the most current data available, the N.C. Department of Transportation is updating the traffic forecast for the NC 109 Improvement Project. The most recent traffic forecast for this project was completed in 2008. Because right-of-way acquisition for the project is not slated to start until 2020, NCDOT has the time needed to update the traffic forecast before submitting its final environmental documentation for the project.

In the fall of 2011, NCDOT identified Alternative 6 as the selected route for NC 109. No significant changes to this route or the right-of-way required are expected as a result of this update. It will, however, shift the next step in the project's schedule. The public hearing originally set for this fall will move to the fall of 2013. Right-of-way acquisition for the project is still scheduled to begin in 2020.

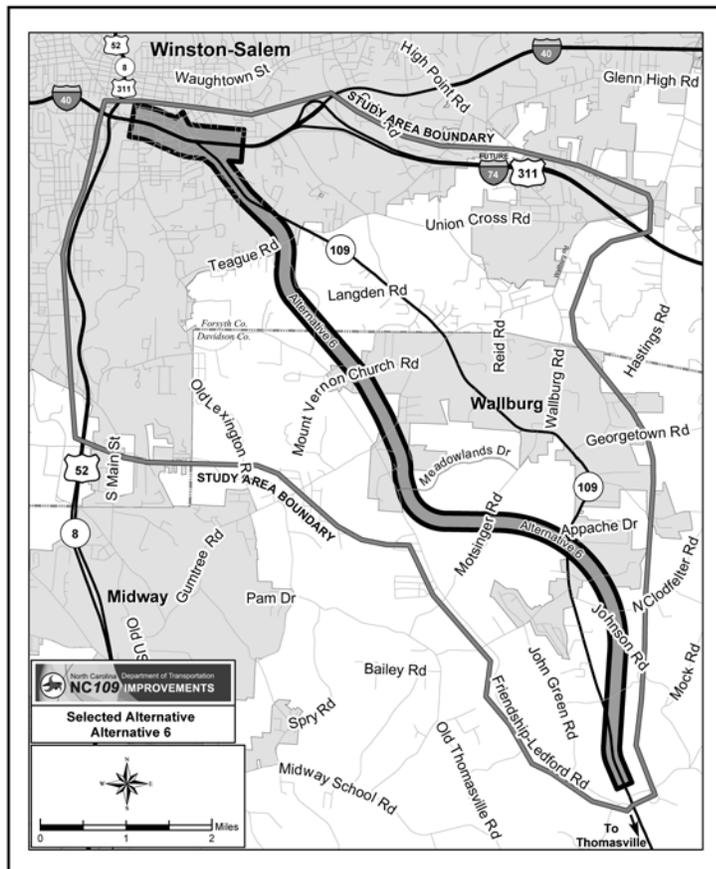

We welcome your input as the project moves forward.
