Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Belinda Inman
5128 Deep River Rd
Sanford, NC 27330-6577

By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Amy Jeroloman

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Angel Jones
1237 Donaldson Ct
Cary, NC 27511-4942

Dear Joyner,

The plan for the Oregon Inlet Bridge is poorly planned and short-sighted in the extreme, and could very well mean the end of a natural area long loved by so many. I personally prefer the system of high speed ferries suggested below.

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

Drew Joyner
1598 Mail Service Center
Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Michelle Kahn

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Karen Kenney

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Georgiann Kiricoples

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Scott Lamb
PO Box 1304
Boone, NC 28607-1304

Dear Joyner,

Thank you for taking the time to read this message. I will keep it very short...
The outer banks are not so big (especially the Hatteras area) that more roads are needed. The islands are overpopulated as it is. PLEASE, do not disturb the natural habitats anymore than they already have been.
Those who truly appreciate the coast of our beautiful state will sacrifice roads for nature.

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Linda Lee

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Shawndy Linqvist
101 Island Mimosa Dr

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Jason Lorch
