Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Susan Tackett

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. James Thomas

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Maureen Topa

By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Mary Turco

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Elissa Vaughn
469 Uppergate Ln
Kernersville, NC 27284-9344

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Deborah Wales
2500 Lamont Norwood Rd

Dear Joyner,

I hope that you will reconsider any plans to build an elevated highway over Pea Island on the Outer Banks. Due to the environmental sensitivity of this area, I am completely against this idea.

This area is very valuable wildlife habitat and some of the most unique on our coast. This first time I went there I was totally amazed at the numbers of birds and species represented there.

Ferries or another bridge with bypasses this area will provide a better long term solution.

Thank you,

That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Mary Ann Watjen
16 Whisper Creek Ln

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Rachel Whetten

We need a safe, reliable, long-term transportation option to Hatteras Island.

PS- I am an avid birder and am finding the atmosphere, both on Pea and Hatteras, Islands to be harsh and uninviting. I have been making less and less trips to the OBX for that reason. I'm tired of being yelled at by passing ORV's with their middle fingers raised. Because of this, more and more birders are not going to the OBX -which results in less tourist dollars for the islands. If you would have more concern for the environment on which the tourist trade relies, then you should seriously consider a solution that does not denigrate the islands even more. Mother Nature will have her way no matter what so why not do the right thing and go ahead with the more long-term and ultimately, more reliable and less costly solution?

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Miss Jessica White

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island..

Thank you,

Mr. Charles Wilson

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Walter Wood
712 Tucker St Unit 509
Raleigh, NC 27603-1865

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

YOU CAN DO BETTER THAN THIS!

Thank you,

Ms. Kathy Zeller
