---

Corrections to the Gaston East-West Connector Indirect and Cumulative Effects Assessment were made between the document version dated March 16, 2009 and the document version dated March 31, 2009.

Below is a detailed listing of where corrections were made:

The following changes were made to Table 1.8 in the document:

- Alternative images 4,5,6,23,24,64,65,77 and 78 were revised to include the correct corridor segments.
- Data contained in the columns representing Wetlands, Sensitive Water Features were corrected.
- Corrections to the data in the column representing Commercial Development were also made to place the correct measure with each DSA.
- Corrections to the data in the column representing Residential Development were also made.

Table 1.2: Segment labels corrected for DSAs 5, 6, 23, 24, 64, 65, 77, and 78

Figure 1.3: Corrected images displayed for DSAs 5, 6, 23, 24, 64, 65, 77, and 78.
