STEP 1 - Initial Sketches

- SINGLE-POINT URBAN INTERCHANGE (SPUI)
- DOUBLE CROSSOVER DIAMOND (AKA DIVERGING DIAMOND)
- TRADITIONAL DIAMOND
- MODERNIZE EXISTING INTERCHANGE FORM

Screening Results
- NL traffic would back-up onto I-440 for the westbound off ramp unless triple left turns are provided. There would not be enough lanes on Western Boulevard to accommodate triple left turns.
- Would accommodate bicycles and pedestrans.
- Generally sufficient existing right-of-way, so minimal direct impacts to surrounding properties.

Screening Results
- Future traffic would back-up onto I-440 for both off ramps unless triple left turns are provided. There would not be enough lanes on Western Boulevard to accommodate triple left turns.
- Generally sufficient existing right-of-way, so minimal direct impacts to surrounding properties.
