

LANE STREET INTERCHANGE (EXIT 63) AREA FACT SHEET

- Current interchange configuration: Diamond
- Proposed interchange configuration: Diamond with Roundabouts
 - Ramps in all four quadrants will be reconstructed.
 - Roundabouts will be constructed at ramp terminals with Lane Street.
 - Existing three-lane bridge on Lane Street over I-85 will be replaced with a four-lane, median-divided bridge.
- Proposed improvements to roads in the interchange area:
 - Lane Street will be widened to accommodate a concrete median and turn lanes through the interchange area.
 - A roundabout will be constructed at Lane Street and Royce Street/Turkey Road.
- *Recommended design modifications:*
 - *Provide right in/right out access to existing service road for Waffle House and motel.*
 - *Provide right in/right out access to Brantley property.*
 - *Provide leftover into Pilot Truck Stop.*
 - *Remove service road shown on public hearing map.*
 - *Attempt to minimize impacts to adjacent properties during final design.*
