Schedule Update

Construction of the roundabout project U-6058 is set to begin in October. The contractor will begin construction with a short closure between Crescent Drive and Carteret Drive. As work progresses towards the intersection of NC 101, there will be a series of lane shifts and closures to construct both the utility upgrades and the new roadway. The various phases of traffic control with the expected timing is shown on the reverse side of this handout. Expected completion date Fall 2027.

Closure Expectations

- Access to all businesses and homes will be maintained
- Temporary closures will be needed on Live Oak St and NC 101 (reverse side of this handout)
- A traffic detour will be used for the entire construction duration for through traffic
- Where feasible, pedestrian access will be maintained using safety barriers
- No Through Traffic on Town of Beaufort. Roads such as Campen Road and Carraway Drive

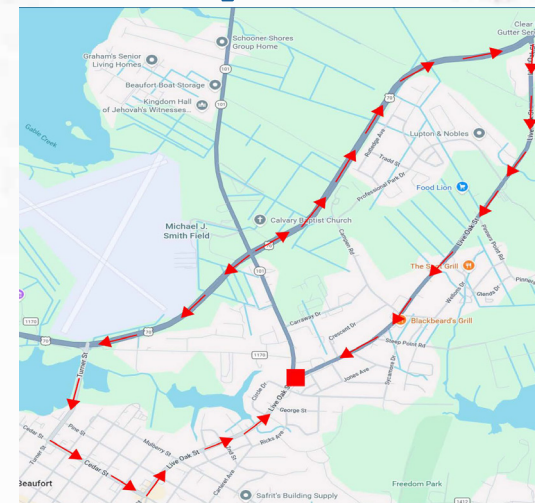

Proposed Improvements

In addition to roadway improvements, a new culvert on NC 101 will be installed, the existing utilities will be replaced/upgraded, a new stormwater drainage system will be installed, the roadway will be paved, and new sidewalks will be constructed.

Project Overview

The N.C. Department of Transportation and the Town of Beaufort are entering the construction phase of improvements along Live Oak St near Fairview Dr to Crescent Dr and on NC 101 from Live Oak St to W. Beaufort Rd. The purpose of the project is to improve mobility at NC 101 and Live Oak St. The roundabout will reduce delays at the intersection and increase safety for motorists.

Detour Map

Project U-6058 Construction Schedule

Updated May 2026

Phase 4

Live Oak Street will be closed June through September 8th as shown above to complete the following:

- Water Line Crossings
- Storm Drain
- Subsurface Drainage
- Grading
- Curb and Gutter
- Sidewalk
- Paving

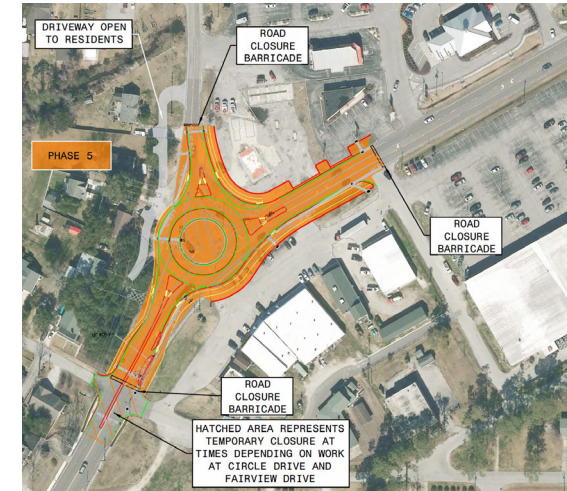

Phase 2B

NC 101 will be closed at the intersection of Live Oak Street from September 8th through November as shown above to complete the following:

- Storm Drain
- Sanitary Sewer

Note:

During June of 2027 the final lift of paving and striping will be done at night under final traffic pattern. Construction complete by July of 2027.

Phase 5

The intersection of NC 101 and Live Oak Street will be closed November through May of 2027 to complete the following:

- Storm Drain
- Grading
- Subsurface Drainage
- Curb and Gutter
- Sidewalk
- Roundabout Construction
- Monolithic Islands
- Signage
- Paving
- Striping
