

A Goal For Moving Around North Carolina

Efficiency Equity **Connectivity**

Improve mobility strategically with greater investment in walking and biking infrastructure (through a Complete Streets approach), improved transportation equity and choice, connectivity between transportation modes, and through better coordination between land use and transportation planning.

Present Day Challenges

Mobility is about moving people and goods. North Carolina must do a much better job of promoting a more efficient statewide transportation system through its support and investment in walking and bicycling. Historically, North Carolina's investment in walking and bicycling facilities and programs does not match the overwhelming need for such facilities.

Actions + Opportunities for the Future

Implement Complete Streets and update NCDOT design guidelines.

Streamline pedestrian and bicycle project delivery.

Enhance transit access policies and ADA (PROWAG) implementation.

Update and modernize the state bicycle route system.

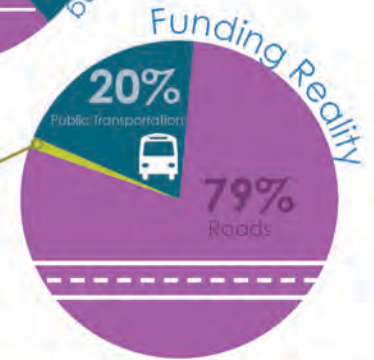

Work with local governments to improve transportation-land use integration.

For detailed information and full action steps, see the WalkBikeNC Plan.

1%

Walking & Bicycling

According to a national transportation poll, Americans think differently about transportation funding than the reality of current budget allocation. (Transportation for America, designed by Collective Strength, and fielded by Harris Interactive, 2007)

In America
40% Of All Trips

2 MILES

87% Drive

13% Walk Or Bike

If...Connected

with a safe bicycle and pedestrian network

70% Of North Carolinians Said They Would Walk or Bike
