

2016 NCDOT AERIAL PHOTOGRAPHY
IMPACTS AND DRIVEWAY TIES
 Limits of construction and their impacts shown on this hearing map are based off of preliminary designs and preliminary ground surveys. During the final design stage, designers will attempt to minimize impacts where feasible using final ground surveys. Final driveway locations will also be determined during final design using final surveys.

DESIGN DATA
 Functional Classification = EXPRESSWAY
 Design Speed = 60 MPH
 Maximum Superelevation = 0.08

- LEGEND**
- BUILDINGS
